

R Programming offers a set of default functions & libraries (such as ggplot2, baseR, lattice) to create visualizations & present data effectively. Below is a guide to create basic and advanced visualizations in R

## BASIC VISUALIZATIONS

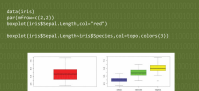

### Histogram

### Bar/ Line Chart

### Box Plot ( including group-by option )

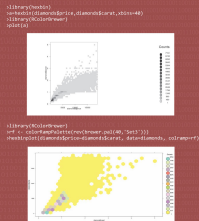

### Scatter Plot (including 3D and other features)

## Advanced Visualizations

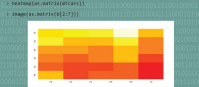

### Hexbin Binning

### Mosaic Plot

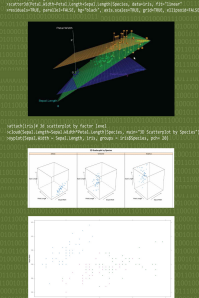

### Heat Map

### Map Visualization

### 3D Graphs

### Correlogram (Gijb)
